The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Meetze.

Meetze shows a stack of planks bound at opposite peripheries with a cover layer coating of tape which extends on to the bottom of the stack of planks. Since the cover layer has low tack adhesive 14 therein, the cover layer is deemed to have a hardness less than that of the planks. Statements pertaining to the subsequent use that the stack of planks will be used for has no patentable significance. In any case, the planks of Meetze could be used as a support for chopping.

Claims 1, 2, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Piper.

Piper shows a stack of planks 12, 13 bound at opposite peripheries with a cover layer 63 coated on the periphery and bottom of the stack of planks. The ceramic and metal planks are deemed to be harder than metallized coating that is applied to the planks. Statements pertaining to the subsequent use that the stack of planks will be used for has no patentable significance. In any case, the planks of Piper could be used as a support for chopping.

Claims 3-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8/1/05.
